Mini Project 2
Open Mini Project
Look at the layout – There are four TextViews in a constraint layout.

Constrian DealerTV to the parent with top and bottom margins of 80dp and Start margin of 20dp

Constrain the remaining three TVs so that they will maintain the following pattern even as the position of DealerTV is changed. You will need to use constraints/margin/bias between the widgits.

Change the background color for the constraint layout so that it uses a purple color
Change each of the edit texts to use a different background color.
