Toast
When you need quick feedback

Mobile Computing - Android

Example:

```
Toast.makeText(getApplicationContext(),
        "A short message!",
        Toast.LENGTH_SHORT).show();
```

- Need a context for it to appear in
- Uses a static method to create the toast object.
- Need to call show() for it to appear.

LENGTH_SHORT is about 1 second
LENGTH_LONG is about 2 seconds
